

User-friendly equipment for automatic and autonomous payments. Our ATMs can be adapted to use different currencies from many countries. You can even program this device to work with two currencies at the same time.

The replacement of exchange is done by automatic counters that distinguish between coins and bills. It supports several payment methods like coins, bills, bank cards, contactless, smartphones, NFC or personalized prepaid cards.

We make a big commitment to accessibility, consequently our ATM complies with European accessibility standards.

- ✓ Payment by smartphone
- ✓ Recycling all kinds of coins and bills
- ✓ Automatic counter for the replacement of coins and bills
- ✓ 17" touch screen
- ✓ Counterfeit money detector

Customization

Our clients can choose both colors and design of the frontal casing, including advertisements. You can also choose the building material and any color for their exterior finish.

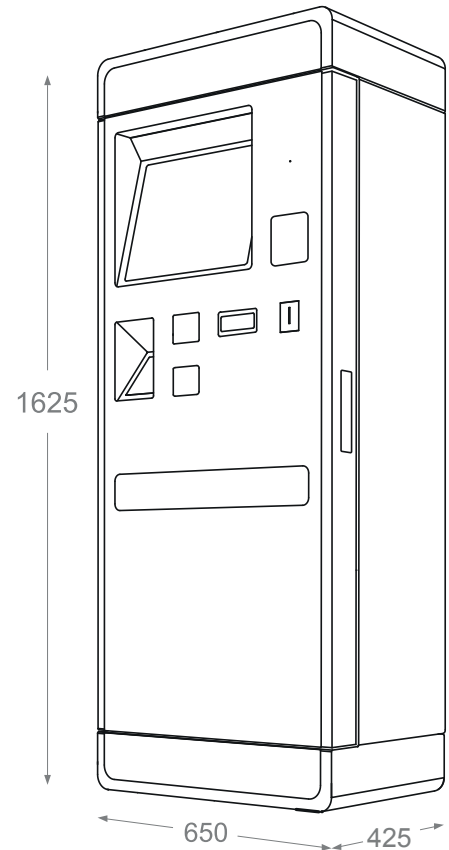

Autonomy

These devices have an IP intercom that can be used to get in touch with the technical support staff and resolve any issue. Considering that our equipment is completely integrated in *Control Panel*, you can manage your facility in remote mode from any part of the world. The state of the paper, the coin/bill recycler and any other components of your machines are available in our platform. In remote it is also possible to help users in case of lost tickets or any other task.

Technical specifications

Ω ATM	
Power	
Energy consumption	300W
Power supply	110-240V
Working conditions	
Operability	→ Cutter life for 1 million cuts → MCBF: 100.000
Temperature	-20°C to 60°C
Casing	
Dimensions	1625x650x425mm (HxWxD)
Weight	150kg aprox
Material	
Steel and acrylic	•
316 Stainless steel and acrylic	○
Electronic	
Electronic	ARM Dual Core 1Ghz 1Gb Ram 4Gb Nand Flash
Operatinf system	Linux "All RAM"
Communication	Ethernet 10/100 Mbps
Hardware	
IP intercom	Microphone and 8Ω speakers
Screen	17" SAW touchscreen
Printer
