

All our equipment has a built-in version.

Equipment for entrances and exits has reader and dispenser devices for different kinds of credentials: barcode, RFID, QR... Like payment built-in machines, we also offer our express lanes and cashless ATMs. In the case of express lanes, you can pay and also read and emit credentials at the entry or exit of the facility but always from your car.

The functional features of these built-in devices are the same as their non-built-in version. They only reduce the space occupied.

- ✓ Built-in
- ✓ IP intercom
- ✓ 7" screen
- ✓ Barcode and RFID
- ✓ Bank card reader
- ✓ For external use

Customization

Our clients can choose both the color and design of the frontal casing, including advertisements. You can also choose the building material and any color for its exterior finish.

Built-in

Our built-in equipment allows you to optimize the space in facilities in which you do not have sufficient space to install other types of machines.

Our built-in version has the special feature of an opening at the back. This allows you to perform maintenance without interfering in the normal use of the equipment.

Technical specifications

	Ω Built-in cashless ATM	Ω Built-in express lane	Ω Built-in dispenser column	Ω Built-in reader column
Power				
Energy consumption	300W		120-600W	
Power supply	110-240V			
Working conditions				
Operability	→ Cutter life for 1 million cuts → MCBF: 100.000		→ Cutter life for 1 million cuts → 2000 vehicle movements/day	
Temperature	-20°C to 60°C
